The ultimate solution for proactive  
dog care, helping them adapt and  
thrive in any environment.

## WHAT ARE PHEROMONES?

Pheromones are chemical substances produced and released by animals in their environment, in order to communicate with other individuals of the same species. They influence the behavior or physiological responses of the receiving individuals.

SecureDog™ is a range of dog products based on Dog Appeasing Pheromone (DAP) which is produced naturally by the female dog to help her puppies feel secure. We have developed an exact copy of the DAP that provides dogs with a safe, peaceful and reassuring environment. The products have no side effects or drowsiness.

## WHY CHOOSE SECUREDOG™?

### Pheromone Expertise

SIGNS is the original global innovator in pheromones.

### Proven Results

Products are all clinically tested and trusted by vets.

### Tailored Solutions

We have developed species-specific formulas in diffusers, creams, and sprays.

### Emotional Balance

Our product range helps pets adapt and promotes harmony in any environment.
